- Full network access
 Guest (Internet only)

Wi-Fi network name 2 (SSID) _____ Wi-Fi password _____ date pw last changed _____

- Full network access
 Guest (Internet only)

Devices on your network

Consider the many devices with access to your network. Review devices through your router's administration interface. Occasional Wi-Fi password change will help ensure only authorized devices are on your network.

Devices may include: Desktop computers, Laptop computers, Tablets, Smartphones, Printer/Scanner/Fax, Smart TVs, Streaming Video services (Firestick, Roku, AppleTV, Etc.), Gaming devices (Xbox, Playstation, Wii, etc.), Other devices including IoT devices, thermostats, home security, sensors, toys, etc).

Network and Device notes below:
